

# On Comms

## Simple

Two cables, one box. Available internationally. Plug and play.

## Low Latency

High fidelity, low latency, digital audio suitable for embedding, broadcast and direction

## Connected

Available with 4G connectivity built in (UK only) for primary or backup connectivity

## remote comms

Don't let local lockdown or travel restrictions limit your production; turn the availability of remote or international directors, producers and talent to your advantage.

Low latency, digital team communications can enable remote direction of a shoot with the production team receiving immediate direction and feedback based on live video feeds.
